Programming ·
Mobile Application
Development ·
Web Development

COURSEWORK

Programming in Python
Programming in C++
Discrete Structures in Computer Science
Computer Organization and Architecture
Algorithms and Data Structures
Software Design Patterns
Mobile Application Development
Operating Systems Development
Computer Networks
Big Data Analysis

PROJECTS

Dive

- A mobile application game for android and iOS. Currently in the developmental stage for android marketplace. The game consists of tilting and tapping the device to avoid obstacles. The game is being developed in java and Flutter.

Personal Website

- A Simple personal website in constant development. The site is designed to show-off current and past projects as well as to gain some experience in web development. The site contains projects that pertain to programming and personal hobbies. Currently this site is under major renovation. I am transitioning the site from a simple HTML/CSS design to a more dynamic site using React.
